What do you need to contact us about?

Data accuracy

What specifically do you need to contact us about?

Hi there, Does the CC have a method by which we can automatically update our all registry information? An API perhaps? For example, as our volunteers come and go, it is hard to manually keep the CC updated, so we would like to be able to automate this. May we request access to this facility, please?

What do you need from the Commission?

An API, or similar, that allows us to automatically advise the Commission of changes to our data.

How are the trustees satisfied that this is in the best interests of the charity?

The trustees are satisfied that this is in the best interests of the charity as this will ensure that our data is kept up to date.
